- Free plant
- Origin: Texas, Mexico (San Luis Potosi)
- Min temp: to 14 deg F
- Usually solitary
  - Stem diameter: to 4 in
  - Height: to 8 in
- Propagated from seed
- Full sun
- Well-drained soil

# Ferocactus wislizeni f flavispina

- Free plant
- Origin: Arizona (Cultivar)
- Min temp: to 14 deg F
- Yellow-spine form of Fishhook Barrel
- Usually solitary
  - Diameter: to 18 in
  - Height: to 3 ft
- Propagated from seed
- Full sun
- Water when dry during warm weather
- Well-drained soil

# Crassula comutata

- **Free plant**
- Origin: South Africa
- Min temp: protect from frost
- Forms cluster
  - Stem diameter: to 1 in
  - Stem height: to 12 in
- Propagated from leaf cuttings, seed, offsets
- Filtered sun
- Water when dry during warm weather
- Well-drained soil

# Mammillaria parkinsonii

- Free plant
- Origin: Mexico (Queretero)
- Min temp: to 14 deg F
- Aka 'Owl's Eyes'
- Forms clusters
  - Head height: to 6 in
  - Head diameter: to 6 in
- Propagated from seed, offsets
- Full sun
- Water when dry during warm weather
- Well-drained soil

# Kalanchoe millotii

- **Free plant**
- Origin: Madagascar
- Min temp: protect from frost
- Forms cluster
  - Stem diameter: to 3
  - Stem height: to 12 in
- Propagated from leaf cuttings, seed, offsets
- Filtered sun
- Water when dry during warm weather
- Well-drained soil

# Parodia leninghausii

- **Free plant**
- **Origin: Brazil (Rio Grande do Sul)**
- **Min temp: to 15 deg F**
- **Forms a short columnar cactus that eventually clusters**
  - **Stem height: to 30 in**
  - **Stem diameter: to 9 in**
- **Propagated from seed, offsets**
- **Full / filtered sun**
- **Water when dry during warm weather**
- **Well-drained soil**

# Echinocereus triglochidiatus

- **Free plant**
- **Origin: Mexico, USA (Arizona, Nevada, Utah, Colorado, California, New Mexico, Texas)**
- **Min temp: to 14 deg F**
- **Forms cluster**
  - **Stem diameter: to 3 in**
  - **Height: to 1 ft**
- **Propagated from seed**
- **Full / Filtered sun**
- **Well-drained soil**

# Euphorbia pseudoglobosa

- Free plant
- Origin: South Africa
- Min temp: protect from frost
- Forms a caudex with segmented stems
  - Caudex diameter: to 3 in
  - Stem height: to 4 in
- Filtered sun
- Propagated from seed
- Water when dry during warm weather
- Use highly porous, well-drained soil
