- Raffle
- Origin: USA (Arizona, Texas, New Mexico, Colorado, Utah, Nevada, California) and Mexico (Sonora, Chihuahua)
- Min temp: to 14 deg F
- Forms large clusters
 - Stem diameter: to 4 in.
 - Stem height: to 15 in.
- Spination highly variable
- Propagated from seed
- Full / Filtered sun
- Water when dry during warm weather
- Well-drained soil

Sansevieria hahnii 'Black Star'

- Raffle
- Origin: Cultivar
- Min temp: can tolerate light frost
- Can tolerate low light
- Forms dense cluster
 - Height: to 2 ft
 - Diameter: to 1 ft
- Propagated from offsets
- Filtered sun / Shade
- Use well-drained soil

Mammillaria magnimamma

- Raffle
- Origin: Central Mexico
- Min temp: to 14 deg F
- Forms large mounds
 - Stem diameter: to 5 in
 - Stem height: to 6 in
- Full sun
- Propagated from seed or offsets
- Water when dry during warm weather
- Use highly porous, well-drained soil

Eulophia petersii

- Raffle
- Origin: Africa (Namibia to Arabian Peninsula)
- Min temp: protect from frost
- Forms large pseudobulbs
- Desert-adapted orchid
 - Height: to 18 in
 - Diameter per bulb: to 3 in
- Propagated from bulbs, seed
- Filtered sun
- Water when dry in warm weather
- Use well-drained soil mix

Echinopsis terscheckii

- Raffle
- Origin: Argentina
- Min temp: to 14 deg F
- Grows up to 18 inches/year with water, fertilizer
- Forms numerous branches
 - Height: to 25 ft
 - Diameter: to 18 in
- Propagated from seeds or cuttings
- Full sun
- Water when dry during warm weather
- Well-drained soil

Agave leopoldii

- **Raffle**
- Origin: Cultivar
 - Hybrid of *A filifera* x *A schidigera*
- Min temp: to 18 deg F
- Grows well in a container
- Forms clusters
 - Height: to 1 ft
 - Diameter: to 1 ft
- Propagated from pups
- Full / filtered sun
- Use well-drained soil

DOOR PRIZES

Pick up ticket as you enter

Must have your name tag

Ferocactus rectispinus

- Door Prize
- Origin: Mexico (Baja California)
- Min temp: to 14 deg F
- Usually solitary
 - Stem diameter: to 24 in
 - Height: to 3 ft
- Propagated from seed
- Full sun
- Well-drained soil

Haworthia limifolia

- **Door Prize**
- **Origin: South Africa, Mozambique, Swaziland**
- **Min temp: protect from frost**
- **Forms cluster of rosettes**
 - Rosette height: to 2 in
 - Rosette diameter: to 3 in
- **Propagated from seed, offsets**
- **Filtered sun**
- **Well-drained soil**

Stenocereus thurberi

- Door Prize
- Origin: Arizona, Mexico
- Min temp: to 24 deg F
- AKA 'Organ Pipe Cactus'
- Forms cluster of tall stems
 - Stem diameter to 8 in
 - Height: to 15 ft
- Propagated from seed, offsets
- Full sun
- Water when dry during warm weather
- Well-drained soil

Alluadia procera

- Door Prize
- Origin: Madagascar
- Min temp: to 24 deg F
- Eventually forms branches
 - Branch diameter: to 2 in
 - Branch height: to 12 ft
- Propagated from seed
- Full / filtered sun
- Water when dry during warm weather
- Well-drained soil

Melocactus matanzanus

- **Door Prize**
- **Origin: Cuba**
- **Min temp: protect from frost**
- **Forms cephalum that keeps growing**
 - **Plant height: 4 in**
 - **Diameter: to 4 in**
- **Propagated from seed**
- **Full / filtered sun**
- **Water when dry during warm weather**
- **Well-drained soil**

Pedilanthus tithymaloides variegata 'Zigzag'

- Door Prize
- Origin: Cultivar (probably Africa)
- Min temp: may tolerate light frost
- Forms small bush
 - Branch diameter: to ½ in
 - Branch height: to 2 ft
- Propagated from seed, offsets
- Filtered sun
- Water when dry during warm weather
- Well-drained soil

FREE PLANTS

Rules:

One plant per person

Pick up outside after break

Please observe social distancing

Echinocactus platyacanthus

- Free plant
- Origin: Mexico (NE and Central)
- Min temp: tolerates mild frost for short periods
- Grows slowly, usually solitary
- Largest of all barrel cacti
 - Diameter: to 5 ft
 - Height: to 8 ft
- Full sun
- Propagated from seed
- Water when dry during warm weather
- Use highly porous, well-drained soil

Agave nickelsiae

- Free plant
- Origin: Mexico (Coahuila, Durango, Nuevo Leon)
- Min temp: to 14 deg F
- Grows slowly
- Forms open rosette
 - Diameter: to 13 in
 - Height: to 13 in
- Full sun
- Propagated from seed, offsets
- Water when dry during warm weather
- Use highly porous, well-drained soil

Coryphantha sulcata

- **Free plant**
- **Origin: USA (Texas)**
- **Min temp: 14 deg F**
- **Forms clumps**
 - **Diameter: to 8 in**
 - **Height: to 8 in**
- **Propagated from seed, offsets**
- **Full sun**
- **Water when dry during warm weather**
- **Well-drained soil**

Ferocactus acanthodes

- Free plant
- Origin: USA (Arizona, California)
Mexico (Sonora, Baja California)
- TCSS field guide pp 126-127
- Min temp: can tolerate some frost
- Usually solitary
 - Diameter: to 20 in
 - Height: to 6 ft
- Propagated from seed
- Full / filtered sun
- Well-drained soil

Echinocereus fendleri

- Free plant
- Origin: USA (New Mexico, Arizona)
- Min temp: to 14 deg F
- Forms clusters
 - Stem height: to 7 in
 - Stem diameter: to 3 in
- Propagated from seed
- Full sun
- Water when dry during warm weather
- Well-drained soil

Escobaria missouriensis ssp asperispina

- Free plant
- Origin: Mexico (Coahuila, Nuevo Leon)
- Min temp: protect from frost
- May form clusters
 - Stem height: to 3 in
 - Stem diameter: to 3 in
- Propagated from seed, offsets
- Full / Filtered sun
- Well-drained soil

Ferocactus latispinus

- Free plant
- Origin: Mexico (Coahuila, Nuevo Leon)
- Min temp: to 14 deg F
- Solitary
 - Stem diameter: to 14 in
 - Stem height: to 12 in
- Propagated from seed
- Full sun
- Water when dry during warm weather
- Well-drained soil

Mammillaria parkinsonii

- Free plant
- Origin: Mexico (Queretero)
- Min temp: to 14 deg F
- Aka 'Owl's Eyes'
- Forms clusters
 - Head height: to 6 in
 - Head diameter: to 6 in
- Propagated from seed, offsets
- Full sun
- Water when dry during warm weather
- Well-drained soil
