

## *Pima Prickly Park – Special Projects Team*

### **Team notification details**

As described in the special projects page, we have a crew of TCSS members that have asked to be notified each week about projects on the work agenda.

Members generally bring their own hand tools, but we do have some tools at the park for team use. Steve brings the 3 rescue Makitas each week when we are planting or doing any excavation.

It is not expected that you attend every week but if you do not attend for an extended period I will check in with you to see if you still want to receive the weekly emails.

Email notice of the coming week project list is typically sent out on Monday of each week.

Below is a list of current members of the special projects team. If you want to participate but you do not want your name listed, let me know and I will remove your name but continue to send weekly emails about the planned activities.

Barb Watts

Bonnie Smietanowska - has small trailer if needed for plant transport

Brian Vandervoet

Christine Flanagan
